

## PSQL Requester/Server Compatibility Matrix

Choose the Client Requester type (access method - for example, Btrieve) chart below and the row of your Client Version, and match it with the column for the version of your Server Edition to determine if that combination is compatible.

Note: Although Actian always recommends that you use client requesters that are the same version as the database engine, Actian also works to make a wide range of Client/Requester/Server combinations compatible. However, based on features of functionality of particular access methods or database versions, some

Key	
	Client
	Server
○	Compatible client/server combination
△	This client/server combination is expected to be compatible, but it has not been fully tested. Please only use this combination for as short a period as possible when absolutely necessary during the upgrade of systems to a newer version of PSQL.

Client Requester Using ActiveX	Pervasive.SQL			PSQL								
	v7.x	2000i	v8.x	v9.x	v10	v10 SP1	v10 SP2	v10 SP3	v11 SP1	v11 SP2	v11 SP3	v12
Pervasive.SQL v7.0												
Pervasive.SQL 2000i												
Pervasive.SQL v8x			○	○	○	○	○	○				
PSQL v9.x				○	○	○	○	○				
PSQL v10					○	○	○	○				
PSQL v10 SP1						○	○	○				
PSQL v10 SP2							○	○				
PSQL v10 SP3								○	○	○	○	△
PSQL v11 SP1									○	○	○	○
PSQL v11 SP2										○	○	○
PSQL v11 SP3											○	○
